Trump to Exclude the Transgender Community from Federal Civil Rights

Summary:

The Trump administration is potentially rolling out a new legal definition under the Department of Health and Human Services to strip federal recognition of the gender identity of some 1.4 million Americans—and require genetic testing in some cases to match a person’s gender with the sex they were assigned at birth. In other words, the government would not recognize a person’s gender other than the one based on their genitalia when they’re born.

Potential Violations

- Hate Speech attack the transgender community as a whole and members of the transgender community
- Harassment against individuals and groups of people
- Bullying against private individuals

33. The Trumpsman viral meme video(parody video of the Kingsman movie) could have been marked as ignore for fictional imagery of violent content, but was Marked as Disturbing(interstitial placed over the video).

In October 2019 a meme video was created based on the movie "Kingsman: The Secret Service". In this movie there is a scene in a church where the character murders all of the people inside the chapel.

This is a fictional scene from a fictional movie, and Trump's face was edited onto the protagonist's head, so it's showing Trump shooting and killing other people who are edited to be the media and his political opponents.

TRUMP MAY ANNOUNCE JERUSALEM AS ISRAEL’S NEW CAPITAL

Summary: Reports indicate President Trump may announce the United States' recognition of Jerusalem as Israel's capital this week. The move is largely a symbolic gesture intended to fulfill a campaign pledge. Trump's impending decision on Jerusalem touches on one of the most sensitive issues of the Israeli-Palestinian conflict. In response, Hamas (the Palestinian Islamist political organization) warns of potential retaliation, increasing likelihood of protest.

activity and violence in response to the announcement. The decision is expected to cause anti-Israel and anti-US sentiment in Muslim majority countries, including on social media.

Please note Zionists are considered a vulnerable group. Any call for action of violence, statements advocating violence against, or aspirational/conditional statements of violence targeting Zionists should be deleted.

Overview: Facebook is beginning to investigate the presence of far-right extremist and extremist terrorist groups (outside of the US) on Facebook and Instagram, and need to understand what content reviewers for the North America market are seeing at the ground level.

In order to mitigate risk for Facebook we are collecting job IDs that highlight trending content related to regional extremist groups and individuals, and job IDs for content that highlight gaps in the policies and guidelines surrounding these individuals and orgs.

Please collect and surface examples on an ongoing basis and send to both Suzannah Fischer and myself.

A post only about civic/political activity or figures (i.e. immigration issues, Trump, US senators, etc) with no mention of urging people to vote, providing instructions for voting, or giving out general information about the voting process SHOULD NOT be noted with “VI.” Over-noting gives us inaccurate information on how much possible voter fraud is in our queues. From Ryan: In the U.S. we see a similar categorization of concepts and whether Facebook considers them political. The following post is from the Florida BI team, BI standing for Brand Integrity. This team was housed in Tampa, Florida and consisted of Cognizant employees. This team would also label content and determine whether or not it was political. The whole purpose of this department is to determine monetization on the content. The fact that Facebook monetizes or demonetizes content based on whether it's a political/social issue means that they are tracking political speech and can limit content based on its political message.

“Tanya Person to Florida BI Team

June 4 2018

Anything, anywhere outside of North America is NOT potentially a political/social issue unless America is mentioned (Ex. Trump gains Putin as an ally would be marked as potentially political/social vs China's economic status would not be potentially a political/social issue).

Organizations such as ASPCA, PETA, Breast Cancer Awareness Groups, Autism awareness, Planned Parenthood, etc, is usually (based on the ad) a potentially political/social issue since it is advocating for awareness of that issue on a social political issues stance via the policy.

The American flag is NOT potentially political/social UNLESS it is being sold (ex. An American flag being sold, a shirt with the American flag on it would be yes to potentially political/social vs A flag outside of a house up for auction, Memorial day sales, etc).

Groups such as Black Lives Matter and Blue Lives Matter are not currently considered a political/social issue, therefore it will be marked as NOT potentially political/social issue. (Regarding Blue Lives Matter, cases of where the American flag with a blue line through it is being sold/promoted on a shirt, watch, ad, etc is not currently known for sure whether it is a potential political/social issue or not)."

Newsworthy Exception

There is a trending image of an album cover for the Brazilian band Negritude Junior. The album cover does violate our Child Nudity policy. However, given the artistic value of this album cover as well as the public interest value, Facebook has decided to make a newsworthy exception.

The post itself as well as re-shares by regular users should be ignored. However, CE labeling (Naked Babies) still applies as the cover depicts fully nude toddlers.

If there are any doubts about how a particular piece of content is shared, please flag it to your SME or TL for review

41. Human Smuggling examples

Facebook's own policy with regards to human smuggling is somewhat odd in that it allows people to ask instructions on how to cross a border, while prohibiting traffickers from finding potential customers. Here is a section of the Human Exploitation policy:

2. We do not allow any of the above mentioned forms of exploitation at any stage. We therefore remove:

1. Recruitment of potential victims which is the soliciting or targeting of individuals for the purpose of exploitation through force, fraud, coercion, enticement, deception, blackmail, or other non-consensual acts.
2. Facilitation of human exploitation by coordinating, transporting, transferring, harboring, or brokering of victims prior or during the exploitation
3. Exploitation of humans by promoting, depicting, or advocating for it.
3. We do not allow content that offers or assists in smuggling of human

The type of content that does not violate our policies and is therefore allowed on our platform.

1. We allow requests for information or solicitation for help on how to get smuggled within the same policy, under Operational Guidelines we see the following:

D. What type of human smuggling content gets removed?

1. Any offer to smuggle or assist in smuggling a person, e.g.
 1. specifying assistance
 2. "we'll help you get across"
 3. specifying a price
 4. "It will cost 700 per person"
 5. making guarantees of journey paths
 6. "safest routes"
 7. "avoid police"
 8. "I've paid off a guy"

E. What type of human smuggling content is ignored?

1. Provision of information on how to leave a country illegally, e.g.

1. Explaining how it's done:
 1. "If you go down to X beach you will able to find a boat"
 2. "Boats leave X beach on a daily basis with migrants"
2. Explaining the gaps in Border Patrols

1. "The Irish Navy is set to remove patrols from July to October and that allows people to pass by undetected"

2. "Because of red tape and bureaucracy, neither.."
3. "Shift changes at midnight are often exploited"
3. Criticizing the enforcement
 1. "Everyone knows you should wait until midnight"
 2. "The coast guards in Italy are easiest to bribe"
